

Community Jobs Project

The Albert River Learning Centre is situated on a 10 acre property on the banks of the Alber River, The centre provides opportunities for people with special needs to participate in educational, recreational, social and work related activities.

BTC Community jobs Project Participants (*funded under Qld Governemnt Skilling Queenslanders For Work Initiative*) installed a disabled toilet and shower, painted the centre internally, built a "chook" shed and constructed a market stall to allow centre participants to sell produce at the farm gate.

Participants were supervised and instructed by a BTC licenced builder to gain real on the job construction industry skills.

A large number of the projects participants gained employment from the skills gained on this project.
